

## LOG OF CHANGES TO DATABASE 21-February-2019

### Fixes to existing data:

Some soil data were missing from the 25-January-2019 data release. These have been added back in. Oops, and thanks Judith Sitters for spotting the error.

### New sites (no sampling data, just GPS coordinates and site plans):

None

### New sampling data (cover, biomass, par):

- [lubb.us 2018 \(Year 0\)](#)
- [yarra.au 2018 \(year 4\)](#)
- [sval.no 2018 \(year 0\)](#) (also "Year -2" data from 2016: two years prior to start of treatments)
- [chilcas.ar 2018 \(Year 6\)](#) (biomass data new, cover data were already uploaded)

### New soil data:

- None...unless you count all the data that were missing in the last release.

### Changes to Dropbox:

- Soil data is now called "soil-nutrients-DATE.csv" and includes both pre-and post-treatment soils
