### FIXES/UPDATES/IMPROVEMENTS

[remove data from core datasets: sevi.us 2015 and 2016](#)

Scott Collins (site PI) got in touch with me and told me that the data (biomass and cover; light was not measured) from Sevilleta in 2015 and 2016 were unreliable, and asked that I pull them. I have deleted these data from the core datasets. They are still available in their raw form; get in touch with me if you need them.

### COMING SOON

Lots of sampling data from new-ish sites, years 0-4
