

LOG OF CHANGES TO DATABASE

May 2020

This update focused on errors PIs found and sites with long temporal trends. Next up are new sites to the database!

Each of these is a hyperlink that will take you to a GitHub page with details about the dataset and any tweaks I made to it in order to make it compatible with our database.

NEW SITES

- June 2020 will focus on these!

NEW SAMPLING DATA (cover, light, par)

- [Spin.us 2019 \(Year 12\)](#)
- [Valm.ch 2019 \(Year 10\)](#)
- [Cbgb.us 2019 \(Year 10\)](#)
- [Lake.us 2019 \(Year 4\)](#)
- [Koffler.ca 2019 \(Year 9\)](#)
- [Cdpt.us 2019 \(Year 13\)](#)
- [Hopl.us 2019 \(Year 13\)](#)
- [Mcla.us 2019 \(Year 13\)](#)
- [Sier.us 2019 \(Year 13\)](#)
- [Konz.us 2007-2019 \(Cover, taxonomic fixes made throughout, 2019 new year to database\)](#)
- [Konz.us 2016 \(Biomass, Year 9\)](#)
- [Sevi.us 2008-2018 \(Biomass and cover\). New allometry equations allow for sorted functional group mass every year. Cover updated with spring and fall surveys, though output should be largely the same.](#)

UPDATES/FIXES

- [koffler.ca](#) 2018 had some biomass fixes
- [Shps.us](#) 2016 biomass was entered, but apparently never sent to us. Mysterious, but deleted.
- [Mtca.au](#) had taxa fixes affecting all years
- [Cbgb.us](#) had biomass fixes for 2018
- [Cereep.fr](#) had biomass replaced entirely for 2018

There's so much more in the [queue](#)... stay tuned, send me any new data, and please keep reporting those bugs.

Peter
